## 1.Introduction

I am from the course work group 4 from BIS group A batch. Me and my team members discussed to implement a website uber the topic “Art” website which sells arts, and my team members and allocated tasks in the group course work for each is stated below.

Student Name	Student Id	Task Number
W.D.S.D Wannirachchi	2017425	Student 1
Rukshan Perera	2017847	Student 2
J.P.R.L De Silva	2017448	Student 3
Thanushi Ganegoda	2017189	Student 4

## 2.Technical discussions

I was allocated with task 4, where I had to implement the image gallery, the site map and the CV. The technical discussion for each of the tasks are stated below.

### 2.1 View images in gallery

On the implementation of the gallery, the first approach was to create the basic HTML structure including a form, as mentioned in the specification. Then the 5 thumbnail images were created and called the function preview() while OnMouseOver, giving the respective image and image description as inputs to the function, to show the image and image description while hovering the mouse over the image.

```
<div class="preview">
  
  <h2 id="image-description">Guernica<br> is a large oil painting on canvas by Spanish artist Pablo Picasso completed in
  June 1937, at his home on Rue des Grands Augustins, in Paris.</h2>
</div>
<ul class="thumb" >
  <li>
     is a large oil painting on canvas
    by Spanish artist Pablo Picasso completed in June 1937, at his home on Rue des Grands Augustins, in Paris. ')" />
  </li>
  <li>
     is a painting in oil on canvas in the Royal Museums of Fine Arts of
    Belgium painted by Pieter Bruegel.')" />
  </li>
  <li>
     is a late
    15th-century mural painting by Italian artist Leonardo da Vinci housed by the refectory of the Convent of Santa
    Maria delle Grazie in Milan, Italy.')" />
  </li>
  <li>
     is a 1642 painting
    by Rembrandt van Rijn.')" />
  </li>
  <li>
     is an oil on
    canvas by the Dutch post-impressionist painter Vincent van Gogh. Painted in June 1889.')" />
  </li>
</ul>
```

Figure 1: Create thumbnail images and calling function to preview full image and description

Then the function was created from JS which is used to change images and descriptions.

```
var lastimg=1;
document.getElementById(0).src=document.getElementById(lastimg).src;
document.getElementById(lastimg).className="thumb selected";

function preview(img,msg){
    document.getElementById(lastimg).className="thumb normal";
    img.className="thumb selected";
    document.getElementById(0).src=img.src;
    lastimg=img.id;

    var imageDescription = document.getElementById("image-description");
    imageDescription.innerHTML = msg;
}
```

Figure 2: Creating the function to show big image and associated description

## 2.2 Change page color and text color

For this task, I first created a select drop down with the colors as options.

For the text color select, the function textcolor() is called passing on the “this” or the color chosen as the input for the function called.

The same way, in the page color select box, the function pagecolor() is called passing on the “this” or the color chosen as the input for the function called.

```
<select id="page" class="choose" size="" onchange="pagecolor(this);" >
  <option value="" disabled selected>Paint the page
  <option value="transparent">Original</option>
  <option value="#80C4DE" >Light steel blue</option>
  <option value="#808000">Olive</option>
  <option value="#2F4F4F">Dark slate blue</option>
  <option value="#DAA520">Golden road</option>
</select>
<select class="choose" id="text" size="" onchange="textcolor(this);" >
  <option value="" disabled selected>Paint the text
  <option value="#000">Original</option>
  <option value="#444" >Grey</option>
  <option value="#FF0000">Red</option>
  <option value="#000080">Navy</option>
  <option value="#DAA520">Golden road</option>
</select>
```

Figure 3: Creating the select boxes and calling the function OnChange

### Function for changing page color

```
function pagecolor(color){
    document.getElementsByTagName("form")["f1"].style.backgroundColor=color.value;
}
```

The color chosen by user is given as input and the form is colored by the chosen color which is taken from the value stored in each option.

### Function for changing text color

```
function textcolor(color){
    document.getElementsByTagName("form")["f1"].style.color=color.value; }
```

The color chosen by user is given as input to the function textcolor() and the form text is colored by the chosen color which is taken from the value stored in each option.

## 2.3 Site map

This task that was assigned to student 4 required the use of SVG to create the sitemap.

A main difficulty faced during the process of the implementation of this site is to position the SVG elements on the required place and in the required direction. But I managed to position the elements by resizing and repositioning them each time.

The flow was then showed using lines and each page was shown in rectangles while the page names were shown with text as of a hierarchical structure.

```
<svg width="100%" height="1000">
  <g id="presentation">
    <!-- presentation page-->
    <rect class="box" x="600" y="10" width="160" height="65" />
    <text class="text" x="617" y="45">Presentation page</text>
  </g>

  <line class="line" x1="683" y1="85" x2="683" y2="140" />

  <!-- home page-->
  <g id="home">
    <rect class="box" x="600" y="150" width="160" height="65" />
    <text class="text" x="646" y="185">Home page</text>
  </g>
```

Figure 4: creating shapes in SVG

When the shapes are created it is linked to the shape so that it will redirect to the respective page OnClick.

```
<g id="Gallery" onclick="location.href='gallery.html'">
  <rect class="box" x="10" y="350" width="160" height="65" />
  <text class="text" x="37" y="390">Gallery</text>
</g>
```

Figure 5: linking the pages

The final flow of the website is displayed as below.

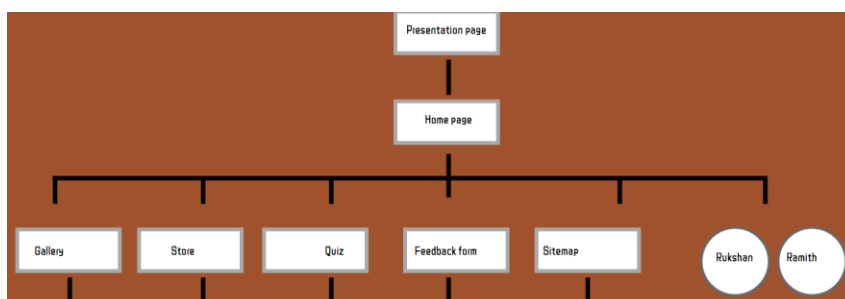

Figure 6: sitemap flow

## 2.4 CV

In the given course work, all the 4 members were required to make the personal CV.

I created the CV using CSS grids. But since CSS grids were new to me personally, it was hence challenging to implement it using this method. To overcome this problem, I got assist from the lecture slides, tutorial sessions and various resources on internet.

I first included the whole content in a wrapper and displayed it as a grid, specifying the grid-template-columns and created the grid.

```
.wrapper{
  display: grid;
  grid-template-columns: 8fr 3fr;
  grid-gap: 1em;
  grid-auto-rows: minmax(100px,auto);
  padding: 0 3.5em 0 3.5em;
  background-image: url(../images/album-announcement-background-1089842.jpg);
  background-size: cover;
  background-position: center;
  background-attachment: fixed;
  background-repeat: no-repeat;
}
```

Figure 7:creating the grid layout

After this, <div> tags were included inside the wrapper which will be applied to the grid layout.

```
<div class="wrapper">
  <div class="box1">
    <div class="heading">
      <h1>Thanushi <span style="color:slategrey;">Haputhanthri</span></h1>
    </div>
    <div class="Introduction">
      <div class="sections">
        <div class="sub">About me</div>
        <p class="paragraph">
          I am an energetic, ambitious and a self-motivated person who has developed a mature and responsible approach to any task that i undertake, or a situation that i am presented with. As an individual with a widespread experience on working in teams, i am also excellent in adapting and proceeding with others to achieve a certain objective on time and with excellence.
        </p>
      </div>
    </div>
  </div>
```

Figure 8: insert <div> tags

All the contact/basic information were displayed along with the image as a nested grid.

```
<div class="nested">
  <div>
    <br><b>Address:</b> 174/1/1 Madiwela RD, Udahamulla, Nugegoda.
  </div><br>
  <div>
    <br><b>Phone:</b> 072 100 4660
  </div><br>
  <div>
    <br><b>Email:</b> thanushi.2017189@iit.ac.lk
  </div><br>
  <div>
    <i class="fab fa-twitter"></i> @thanushi23
  </div>
  <div>
    <i class="fab fa-linkedin"></i> Thanushi Ganegoda
  </div>
  <div>
    <i class="fab fa-instagram"></i> Thanushi Ganegoda
  </div>
  <div>
    <i class="fab fa-facebook"></i> Thanushi Ganegoda
  </div>
  <div>
    <br><b>Familiar Tools :</b><br>
    <i class="fab fa-trello"></i> Trello<br>
    <i class="fab fa-slack"></i> Slack
  </div>
  <div>
    <br><b>Familiar languages:</b>
    <ul>
      <li>English</li>
      <li>Sinhala</li>
    </ul>
  </div>
  <div>
    <br><b>References:</b> available on request
  </div>
</div>
```

```
.nested{
  display: grid;
  font-size: 140%;
  font-family: 'Oswald', sans-serif;
  color: #181818;
}
.nested > div{
  border-top-style: solid;
  border-top-width: 10px;
  border-top-color: slategrey;
}
```

Figure 9: Creating nested grids

Figure 10: Nested grid content

### 3. Discussion of UI and application of UX principles

Our art website has a modern concept in it. Hence each page was created with great concern on UI UX principles. The target audience of the website are the artistic individuals with an eye urging for color and creativity in the site.

Figure 11:Gallery header

Above shown is the header of the gallery with a full background image covering the full screen to attract the attention via color combinations and visual balance which is centered and is symmetrical.

Just like the shown example, the rest of the pages are designed.

#### HTML code for gallery header

```
<header id="#top">
  <h1 class="title">Art Vault Gallery</h1>
  <section class="move">
    <button class="direct" onclick="location.
      href='#photos'">explore famous arts >>>
    </button>
    <button class="direct" onclick="window.
      location.href='#bottom'">jump to page
      bottom >>></button>
  </section>
</header>
```

Figure 12:Gallery Header

## CSS code for header

```
header{
  background-image:linear-gradient(rgba(0,0,0,0.5),rgba(0,0,0,0.5)),url(../images/QilluEM.jpg);
  position: relative;
  height: 100vh;
  background-size: cover;
  background-position: center;
  background-attachment: fixed;
  background-repeat: no-repeat;
}
.title{
  position: absolute;
  margin: 15% 0% 2% 0;
  width: 100%;
  color: white;
  font-size: 1200%;
  font-weight: 900;
  text-align: center;
  font-family: 'Tangerine', cursive;
  .webkit-background-clip: text;
  .webkit-text-fill-color: transparent;
  background-image: url(../images/Inventive-Installations-Playing-with-Colors-and-Shades-900x600.jpg);
  background-size:auto;
  animation-fill-mode:forwards;
  background-position: 0%;
  background-attachment: unset;
  animation-timing-function:linear;
  animation-play-state: running;
  animation: image infinite 25s;
}
@keyframes image {
  100% {
    background-position: 0%;
  }
  50% {
    background-position: 100%;
  }
  0% {
    background-position: 0%;
  }
}
.move{
  transform: translate(20%,1010%);
}
.direct{
  border: 1px solid #fff;
  text-decoration: none;
}
```

Figure 13: CSS code for gallery header

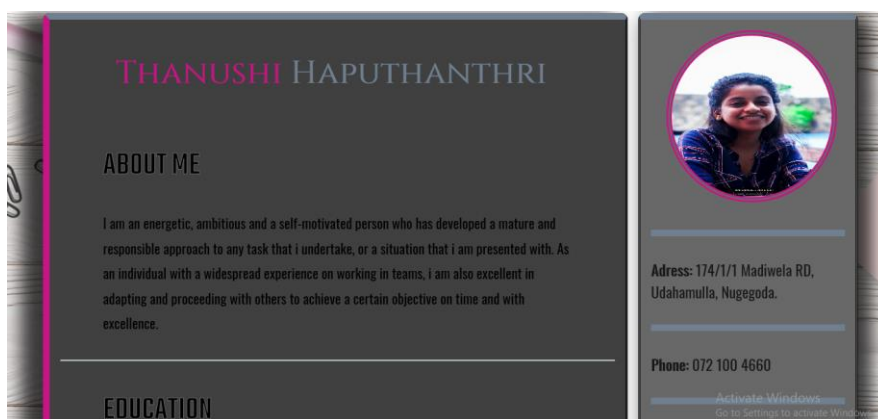

Figure 14:CV with borders

```
.box1{
  border-style: double;
  border-left-style: solid;
  border-left-width: 10px;
  border-left-color: mediumvioletred;
  border-top-style: solid;
  border-top-width: 10px;
  border-top-color: slategrey;
  border-radius: 10px;
  -webkit-box-shadow: -26px 10px 39px 8px rgba(0,0,0,0.75);
  -moz-box-shadow: -26px 10px 39px 8px rgba(0,0,0,0.75);
  box-shadow: -26px 10px 39px 8px rgba(0,0,0,0.75);
}
```

Figure 16:left CV border

```
.nested > div{
  border-top-style: solid;
  border-top-width: 10px;
  border-top-color: slategrey;
}
```

Figure 15:Top CV border

Figure 14 shows the personal CV where I have used matching color borders to maintain the appealing look of the website.

Figure 17: part b header

As shown in the above image, same logos are used throughout the gallery. And discussing about the color combination, the website is matching yellow, brown and red colors and its shades to give color balance to the page.

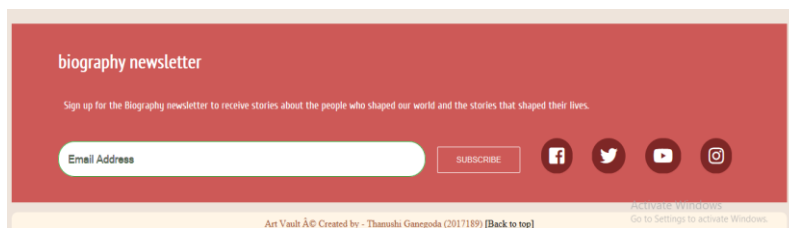

Figure 18: part b newsletter

This also shows how the same text types and font sizes are used along with the same icons used in the website.

## b. Code to achieve good color balance & ensure consistency

### CSS used to ensure good and consistent color balance

```
.wrapper > div{
  background: #686868;
  padding: 1em;
}
.wrapper > div:nth-child(odd){
  background: #404040;
  justify-items: end;
}
.nested{
  display: grid;
  font-size: 140%;
  font-family: 'Oswald', sans-serif;
  color: #181818;
}
.nested > div{
  border-top-style: solid;
  border-top-width: 10px;
  border-top-color: slategrey;
}
```

Figure 19: CSS used to ensure good and consistent color balance

### What HTML code you wrote to structure your website to ensure good and consistent composition

```

<div class="wrapper2">
  <div class="thumb">
    
    <div class="desc" onclick="location.href='https://en.wikipedia.org/wiki/The_School_of_Athens'">The School of Athens<br>[1509 &#45; 1511]</div>
  </div>
  <div class="thumb">
    
    <div class="desc" onclick="location.href='https://en.wikipedia.org/wiki/Transfiguration_(Raphael)'">Transfiguration<br>[1516 &#45; 1520]</div>
  </div>
  <div class="thumb">
    
    <div class="desc" onclick="location.href='https://en.wikipedia.org/wiki/Sistine_Madonna'">The Sistine Madonna<br>[1512]</div>
  </div>
  <div class="thumb">
    
    <div class="desc" onclick="location.href='https://en.wikipedia.org/wiki/Disputation_of_the_Holy_Sacrament'">Disputation of the Holy Sacrament<br>[1509 &#45; 1510]</div>
  </div>
  <div class="thumb">
    
    <div class="desc" onclick="location.href='https://en.wikipedia.org/wiki/The_Parnassus'">The Parnassus<br>[1511]</div>
  </div>
  <div class="thumb">
    
    <div class="desc" onclick="location.href='https://en.wikipedia.org/wiki/The_Expulsion_of_Heliόδorus_from_the_Temple'">The Expulsion of Heliόδorus from the Temple<br>[1511 &#45; 1512 ]</div>
  </div>
  <div class="thumb">
    
    <div class="desc" onclick="location.href='https://en.wikipedia.org/wiki/La_velata'">La velata<br>[1515]</div>
  </div>
  <div class="thumb">
    
    <div class="desc" onclick="location.href='https://en.wikipedia.org/wiki/Deliverance_of_Saint_Peter'">Deliverance of Saint Peter<br>[1514]</div>
  </div>
  <div class="thumb">
    
    <div class="desc" onclick="location.href='https://en.wikipedia.org/wiki/The_Mass_at_Bolsena'">The Mass at Bolsena<br>[1512 ]</div>
  </div>
</div>

```

### Did you write any CSS to consistently format the appearance of graphics?

```

.image{

    border-style: double;

    border-color: #B3B3B3;

    margin-top: 7em;

}

```

## 3.3 Typography / consistency

### a. Design

Throughout the website the same types fonts are used with consistent font sizes and colors. The fonts are kept simple increasing its readability and the fonts used are kept minimal, distinguishable and standard, not over using many kinds of fonts which keeps the site professional. Line length is not more than 60 and in addition, line height is also kept standard, which improves readability. All capital letters are avoided since it is harder for the user to read. Instead capitalize is used. The texts have a contrast ratio of at least 4.5:1 against its background which improves the readability and the tendency to be more visually appealing to the user is increased. And in conclusion, the paragraph content is aligned to one side (left) as it is easier to read. The main titles, sub titles, paragraph titles and normal texts are differentiated in a fine manner. These types of principles regarding typography improves the UI UX structure of the website.

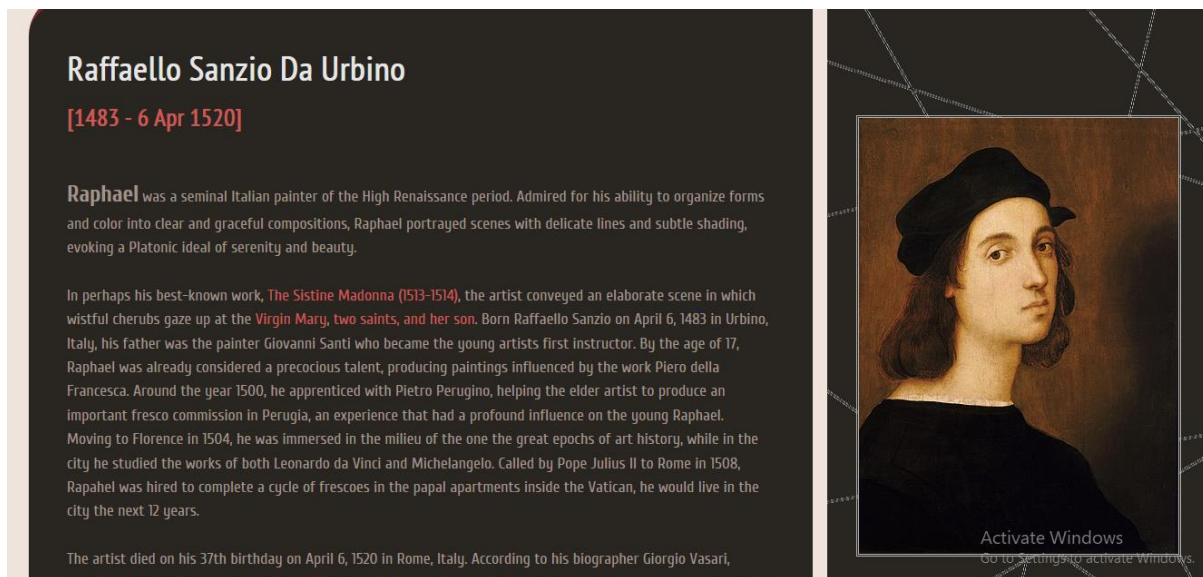

Figure 20: typography

b. Code to achieve good typography / consistency

What CSS you created to modify text.

```
.box p{
  font-family: 'Tangerine', cursive;
  font-size: 650%;
  text-transform: capitalize;
}
```

Figure 21:fonts

```
.para h1{
  font-family: 'PT Sans Narrow', sans-serif;
  font-size: 240%;
  text-transform: capitalize;
  color: #E6E6E6;
  text-align: left;
}

.para p{
  text-align: left;
  color: #a3958d;
  font-size: 110%;
  font-family: 'Cuprum', sans-serif;
  line-height: 1.5;
}
```

Did you use any of the online tools to test the legibility of your web site? What were the test results?

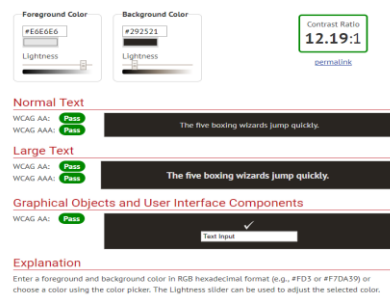

Figure 22: color contrast 1

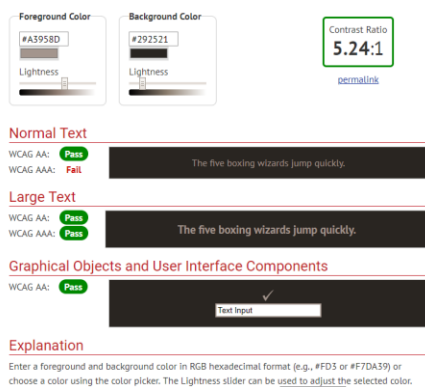

Figure 23: color contrast 2

I used the website webaim.com to check the color contrast of the fonts. Since the ratios were about 4:2:5

How did you write the CSS to ensure consistency?

Figure 24: consistency

```
body{
  background: #eee4db;
}
header{
  padding: 1em;
  background-image: linear-gradient(rgba(0,0,0,0.5),rgba(0,0,0,0.5)),url(../images/schoolofathenes.jpg);
  height: 56vh;
  margin: 0.5em;
  background-size: cover;
  background-position: center;
  background-attachment: fixed;
  background-repeat: no-repeat;
}
.box {
  font-family: 'Tangerine', cursive;
  font-size: 650%;
  text-transform: capitalize;
}
.wrapper{
  display: grid;
  grid-template-columns: 3fr 1fr;
  padding: 4em 1em 1em 1em;
  grid-gap: 1em;
}
.wrapper > div{
  border-top: 8px solid #7E2726;
  background-image: url(../images/Geometric-Lines-Desktop-Wallpaper.png);
  background-color: #292521;
  padding: 1em 2em 2em 2em;
}
.wrapper > div:nth-child(odd){
  background: #292521;
  border-top-left-radius: 50px;
  border-bottom-left-radius: 50px;
}
```

### 3.4 Gestalt principles grouping

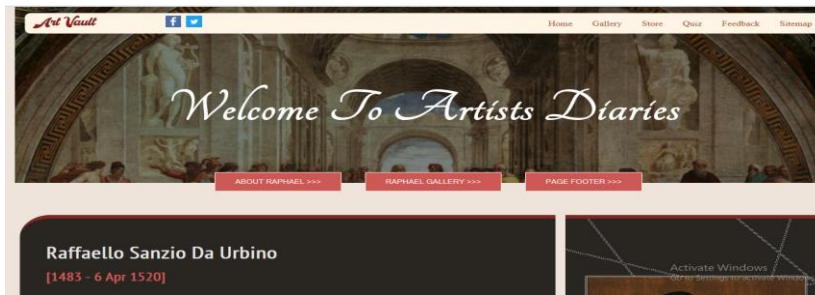

Figure 25.1

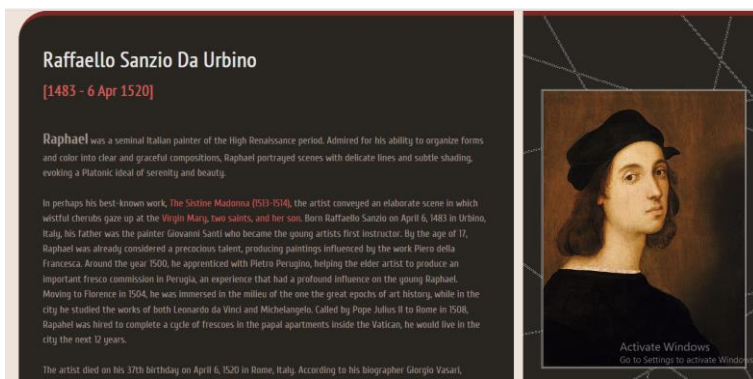

Figure 25.2

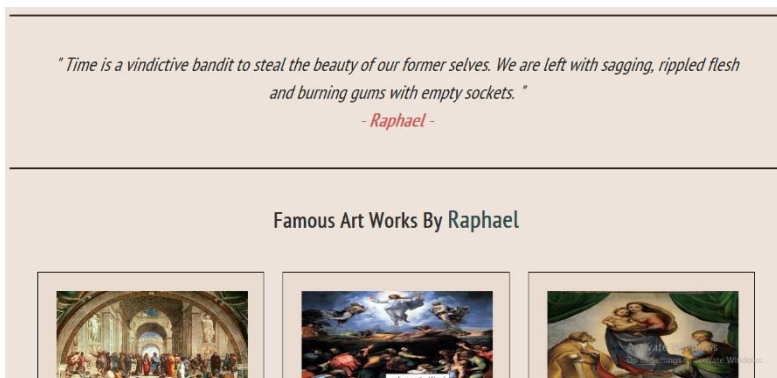

Figure 25.3

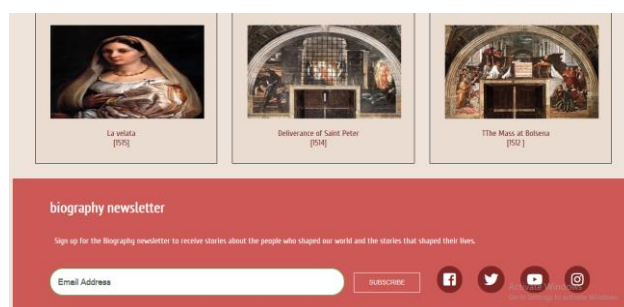

Figure 25.4

Figure 26.1

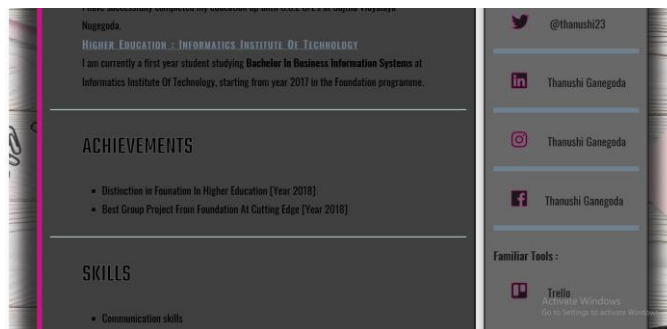

Figure 26.2

In the above example **proximity** that states that "objects or shapes that are close to one another appear to form groups" has been applied in the following elements:

- The three buttons with anchor links on the top, hanging on the header are grouped together creating proximity
- In the section of the famous art works by Raphael the image boxes are grouped together creating clear proximity.
- The social media buttons at the end of the page are also grouped together. Hence it also can be called as proximity.

In addition, **closure** is applied by drawing a line between stamps makes those groups more explicit.

- The use of 2 lines from the top and bottom of the quotation in the figure 5.3, displaying its self, different from the other content is an example for closure.
- Border is colored before starting the content after the header in figure 25.2.
- The contact information is under the principle of closure in figure 26.2 as it is divided with a line.

- At the end of the page, newsletter is bringing in closure to the site by dividing it self from the art works in figure 25.4

**Similarity** stands for the things which share visual characteristics such as shape, size, colour, texture, or value will be belonging together in the viewer's mind. In this example this principle is applied by repeating the same style to the boxes that contain the stamp thumbnail, the stamp description and related icons and buttons indicate that enclosed content is of similar type.

- The image boxes and descriptions, sizes and color of the famous art work gallery are visually similar
- All the button in the pages take the same structure and style.
- The icons in figure 26.2 take the same format.
- The boxes in the figure 26.2, with topics About me, skills, education etc. comes under the principle closure for being similar boxes.

### 3.5 Accessibility (graphics/forms)

#### a. Graphical elements - Design/Code

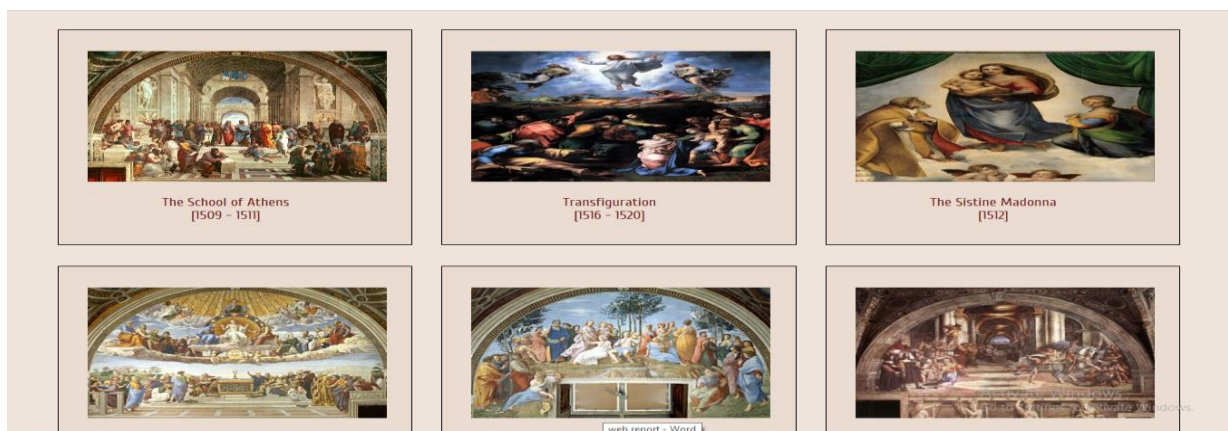

Figure 27

Throughout the website, including the above provide example, “alt” tags are used in order to make sure that in case that the graphics cannot be displayed the users would still get the required information and would still be able to interact with buttons and icons. And also meaningful/ descriptive names are given for links for better accessibility.

Anchor links were also used for better accessibility.

```

<div class="thumb">
  
  <div class="desc" onclick="location.href='https://en.wikipedia.org/wiki/The_School_of_Athens'">The School of Athens<br>[1509 &#45; 1511]</div>
</div>
<div class="thumb">
  
  <div class="desc" onclick="location.href='https://en.wikipedia.org/wiki/Transfiguration_(Raphael)'">Transfiguration<br>[1516 &#45; 1520]</div>
</div>
<div class="thumb">
  
  <div class="desc" onclick="location.href='https://en.wikipedia.org/wiki/Sistine_Madonna'">The Sistine Madonna<br>[1512]</div>
</div>

```

## 4 Janet

4.) Janet regulations We created our page according to Janet regulations and the purpose of our work is for academic purpose.

- Subject to clauses 8 to 16 our website is absolutely non-commercial and non-profitable.

8. Janet may not be used by a User Organization or its Members for any activity that may reasonably be regarded as unlawful or potentially so. This includes, but is not limited to, any of the following activities. [?]

- No unethical or illegal duty is carried out through the site.

9. Creation or transmission, or causing the transmission, of any offensive, obscene or indecent images, data or other material, or any data capable of being resolved into obscene or indecent images or material.

- We haven't used any offensive or indecent pictures, data or the materials in our it.

11. Creation or transmission of material with the intent to defraud

- No intention of defraud when we are transmitting our materials.

16.3 violating the privacy of other users;

- No violation of privacy is occurred.

16.7 other misuse of Janet, such as the introduction of viruses or other harmful software via Janet to resources on Janet, or on another User Organizations network

- No misuse or introduction to viruses is generated through our page.

## 5. Conclusions

During the progress of this coursework, I have surely acquired plentiful of moral and technical skills.

It was truly a pleasure to work together with my fellow team members throughout the course work, building team work. And also via the web course work, I learn so much of technical skills on web development. The only problem encountered was that technical matters raised because of minimum knowledge.

      <h1>Raffaello Sanzio da Urbino <br><span style="font-size:
70%; color: #cd5957">[1483 - 6 Apr 1520]</span></h1>

      </div>

      <p>

        <span style="font-size: 25px"><b>Raphael</b></span> was a seminal Italian
painter of the High Renaissance period. Admired for his ability to organize forms and color into clear
and graceful compositions, Raphael portrayed scenes with delicate lines and subtle shading, evoking
a Platonic ideal of serenity and beauty.<br><br> In perhaps his best-known work,<span
onclick="location.href='https://en.wikipedia.org/wiki/Sistine_Madonna'" style="color: #cd5957;
cursor: pointer;"> The Sistine Madonna (1513-1514)</span>, the artist conveyed an elaborate scene

```

in which wistful cherubs gaze up at the onclick="location.href='http://www.italianways.com/raphael-and-mary/'" style="color: #cd5957; cursor: pointer;">">Virgin Mary, "> two saints, and her son</span>. Born Raffaello Sanzio on April 6, 1483 in Urbino, Italy, his father was the painter Giovanni Santi who became the young artists first instructor. By the age of 17, Raphael was already considered a precocious talent, producing paintings influenced by the work Piero della Francesca. Around the year 1500, he apprenticed with Pietro Perugino, helping the elder artist to produce an important fresco commission in Perugia, an experience that had a profound influence on the young Raphael.  
Moving to Florence in 1504, he was immersed in the milieu of the one the great epochs of art history, while in the city he studied the works of both Leonardo da Vinci and Michelangelo. Called by Pope Julius II to Rome in 1508, Rapahel was hired to complete a cycle of frescoes in the papal apartments inside the Vatican, he would live in the city the next 12 years.  
  
The artist died on his 37th birthday on April 6, 1520 in Rome, Italy. According to his biographer Giorgio Vasari, Raphaels premature death was caused by a fever brought on by excessive lovemaking with his mistress Luti. Today, his works are held in the collections of the Alte Pinakothek in Munich, the Hermitage Museum in St. Petersburg, the Louvre Museum in Paris, the National Gallery in London, the Rijksmuseum in Amsterdam, and the Metropolitan Museum of Art in New York, among others.

## Appendix C: Individual Statement

Student Name:	Thanushi Ganegoda Haputhanthri	Student Id:	2017189
State what tasks you carried out in the project.			
Student 2:  Gallery  Site map  CV  Part B			
State what you enjoyed and did not enjoy about teamwork.			
I enjoyed working in the team			
State what you learnt about teamwork.			
Unity and respecting others			
State what skills you gained/learnt from undertaking the project.			
Team work skills  Working under pressure  Web design and development skills			
State any strengths about yourself that emerged whilst undertaking the project.			

Interest in web design			
comitment			
State any weaknesses about yourself that emerged whilst undertaking the project.			
Low knowledge on web			
State how you would do things better if you were to undertake the project again.			
Start the project earlier			
Additional general or project specific comments:
